

**Predisposizione di un file PDF protetto da password generato  
da un documento di Word**

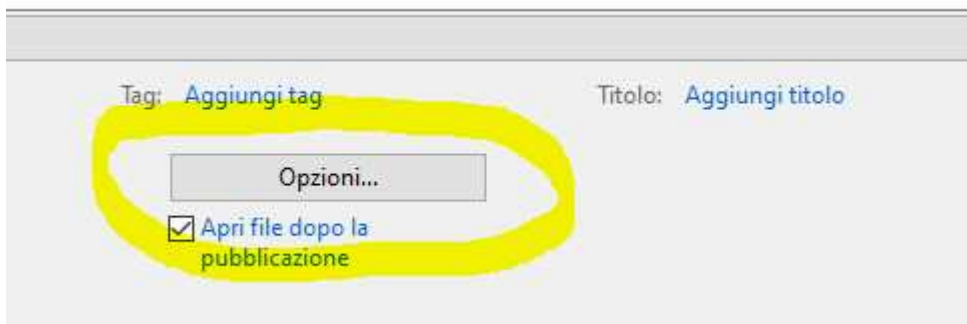

Creazione del documento;

Salvare il file in formato PDF;

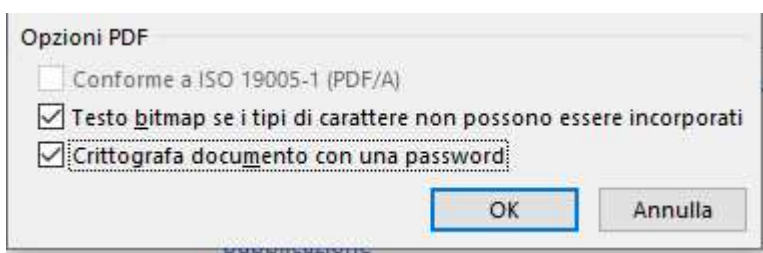

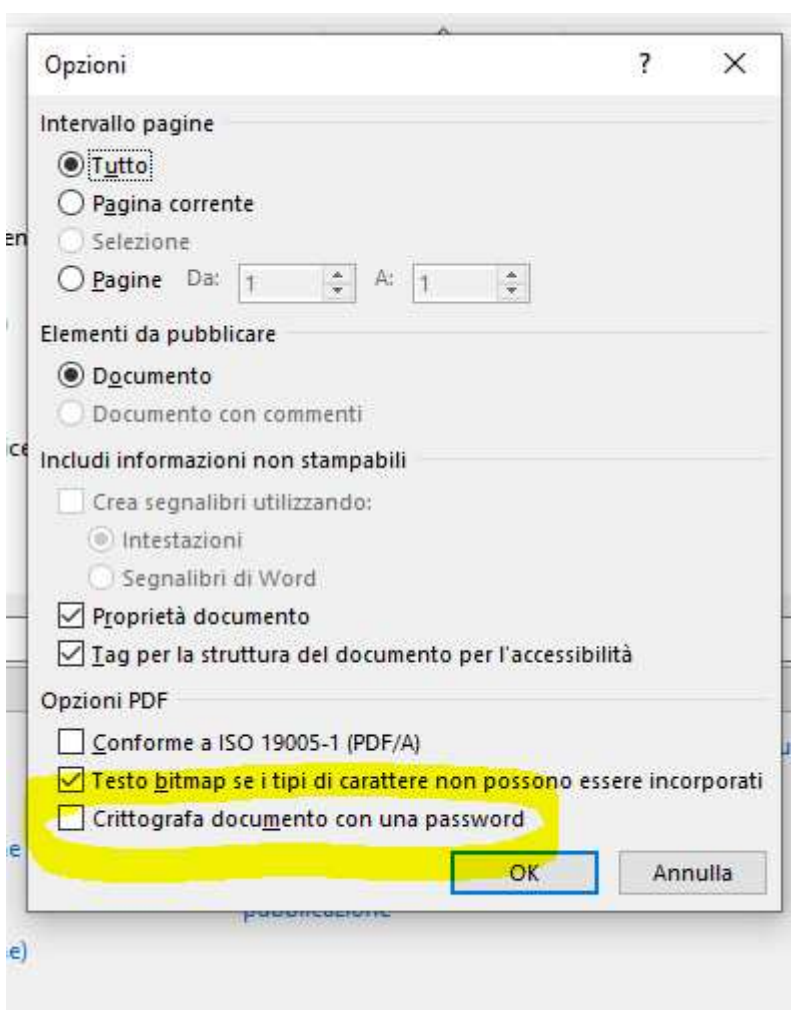

The image shows the Microsoft Word 'Save As' dialog box. The title bar reads 'Documento2 - Word'. The main window title is 'Salva con nome'. The left sidebar contains navigation options: Informazioni, Nuovo, Apri, Salva, Salva con nome (highlighted), Stampa, Condividi, Esporta, Chiudi, Account, and Opzioni. The main area shows a file explorer view of the 'Documenti' folder on the local drive. A list of file types is displayed, with 'PDF (\*.pdf)' selected. Below the list, the 'Nome file:' field is empty, and the 'Salva come:' dropdown is set to 'PDF (\*.pdf)'. The 'Autori:' field contains 'Gianfranco Bodano'. The 'Tag:' field is 'Aggiungi tag' and the 'Titolo:' field is 'Aggiungi titolo'. Under 'Ottimizza per:', the 'Standard' radio button is selected, with a sub-option '(pubblicazione online e stampa)'. There is an 'Opzioni...' button and a checked checkbox for 'Apri file dopo la pubblicazione'. At the bottom, there are 'Salva' and 'Annulla' buttons.

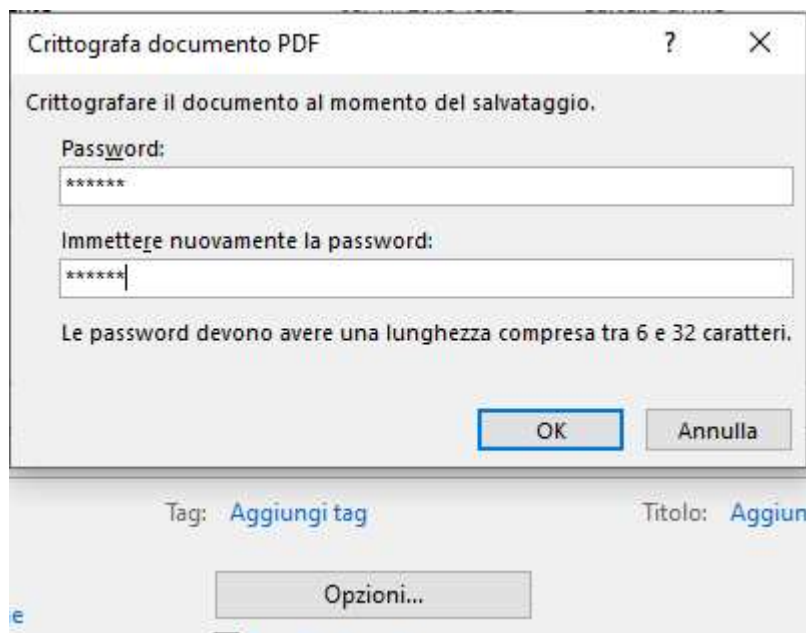

Selezionare "Opzioni";

Selezionare "Crittografa documento con una password";

Inserire la password e confermare con "OK"

The image shows a screenshot of a software dialog box titled "Crittografa documento PDF". The dialog box contains the following elements:

- Text: "Crittografare il documento al momento del salvataggio."
- Text: "Password:" followed by a text input field containing "\*\*\*\*\*".
- Text: "Immettege nuovamente la password:" followed by a text input field containing "\*\*\*\*\*".
- Text: "Le password devono avere una lunghezza compresa tra 6 e 32 caratteri."
- Buttons: "OK" and "Annulla".

Below the dialog box, there is a partial view of another interface with the following elements:

- Text: "Tag: [Aggiungi tag](#)"
- Text: "Titolo: [Aggiun](#)"
- Button: "Opzioni..."

All'apertura del file PDF verrà richiesta la password inserita precedentemente attraverso la procedura sopra indicata.;
